Portfolio

Education

Campbellsville University

Master of Science in Computer Science; GPA: 3.6/4.0

Louisville, KY

Aug 2022 - May 2024

Jawaharlal Nehru Technological University, Hyderabad

Bachelor of Technology in Computer Science and Engineering; CGPA: 6.56/10.0

Hyderabad, India

Aug 2017 - May 2021

Skills

Software Development: Object Oriented Programming, Data Structures, Algorithms, LLD, HLD, RESTful APIs.

Frontend Technologies: React.js, Redux, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, JSON, Material-UI

UI/UX Development: Figma, Responsive Design, Web Accessibility (WCAG)

Performance Optimization: Lazy Loading, Code Splitting, SEO, Page Speed Optimization

Testing Frameworks: Karma, Mockito, Cypress, Jest, Enzyme

Build & Deployment Tools: NPM, Yarn, Webpack, Babel, Vite, CI/CD (Jenkins, GitLab CI)

Backend Knowledge: Node.js, Express.js, REST APIs, Spring Boot

Cloud & DevOps Tools: Azure, AWS, Docker, Jenkins, GitLab CI

Databases: MongoDB, DynamoDB, MySQL, NoSQL, PostgreSQL

Version Control & Collaboration: Git, GitHub, Agile/Scrum

Certifications: [Azure Fundamentals \(AZ900\)](#), [Azure Developer Associate \(AZ204\)](#).

Work Experience

Software Developer, Federal Soft Systems - USA

Aug 2024 - Present

- Developed responsive React.js applications with reusable components and dynamic UI/UX.
- Implemented **Redux state** management, improving application maintainability and scalability.
- Integrated backend **REST API's** into the frontend for data.
- Improved application performance by reducing page load from 5sec to 2sec through lazy loading, code-splitting, and optimized database queries.
- Built and documented reusable UI components using **Storybook** to standardize design and accelerate development across teams.
- Used **Cypress** for automated E2E testing.
- Used **Postman** for testing and validating APIs
- Deployed application using AWS services including S3 for hosting, CloudFront for CDN, and Lambda for serverless execution.
- For accessibility features, followed **WCAG guidelines** and implemented **ARIA** roles to enhance accessibility for screen readers and keyboard navigation.
- Tech Stack: HTML, CSS, React.js, Redux, JavaScript, TypeScript, JSON, Node.js, AWS, Postman, GraphQL, Cypress, Jest, Jenkins, Mocha

Software Developer, Virtu Tech - India

March 2020- May 2022

- Developed high-performance Single Page Applications (SPAs) using **React.js** and **Redux-Saga** to enhance speed and user engagement.
- Implemented global state management for key features such as "Add to Cart" using **Redux** in an e-commerce platform.
- Used **Context API** for lightweight state management in non-critical components, reducing code complexity.
- Implemented CI/CD pipelines with Jenkins, cutting deployment times by 30%.
- Created custom Hooks and custom components to keep the code reusable and easy to manage.
- Achieved 100% Lighthouse scores for accessibility and performance.
- Wrote unit tests using Jest to ensure code coverage and prevent regression issues.
- Tech Stack: HTML, CSS, React.js, Redux Saga, JavaScript, Spring Boot, Node.js, MongoDB, Azure, Jest, Next.js

Projects

- E-Commerce Website** | React.js, Redux, Node.js, HTML5, CSS3, Bootstrap, MySQL, AWS **Dec 2022**
- Developed a responsive and scalable e-commerce web application with features like product listing, cart management, and secure checkout. Enhanced user experience with optimized UI and cross-browser compatibility.
- Employee Attrition Prediction** | Python, Pandas, NumPy, TensorFlow, Matplotlib, Seaborn, SQL **Jan 2020**
- Designed a comprehensive data science pipeline to predict employee attrition and evaluate job performance using AI models. Integrated data preprocessing, feature engineering, and predictive modeling for actionable insights.
- Moving Object Detection** | Python, OpenCV, YOLO, Convolutional Neural Networks (CNNs) **Dec 2019**
- Developed a system to detect and track moving objects in real-time video streams with 90% accuracy, enabling enhanced video analysis.
- Attendance with Face Recognition** | Python, OpenCV, Dlib, NumPy, Pandas, MySQL, PyTorch **Aug 2018**
- Developed an automated system to track attendance efficiently by detecting and recognizing faces in real-time. Improved tracking efficiency by 50% and reduced manual intervention.
