Education

Campbellsville University

Master of Science in Computer Science; GPA: 3.6/4.0

Louisville, KY

Aug 2022 - May 2024

Jawaharlal Nehru Technological University, Hyderabad

Bachelor of Technology in Computer Science and Engineering; CGPA: 6.56/10.0

Hyderabad, India

Aug 2017 - May 2021

Skills

Languages: React.js, Redux, JavaScript, TypeScript, HTML5, CSS3, Spring Boot, Java, Node.js, Express.js, Bootstrap, Material-UI.

Software Development: Object Oriented Programming, Data Structures, Algorithms, LLD, HLD, RESTful APIs.

Cloud & DevOps Tools: AWS, Azure, Docker, Kubernetes, Jenkins, GitHub, GitLab CI, Terraform.

Testing: JUnit, Mockito, Cypress, Jest, Enzyme.

Databases: MongoDB, DynamoDB, MySQL, NoSQL, PostgreSQL.

Build & Deployment Tools: Webpack, Babel, Vite.

Other Skills: Figma, Web Accessibility (WCAG 2.2), Kafka.

Certifications: [Azure Fundamentals \(AZ900\)](#), [Azure Developer Associate \(AZ204\)](#).

Work Experience

Software Developer, Federal Soft Systems - USA

Aug 2024 - Present

- Built dynamic React.js applications with reusable components, boosting user engagement by 15%.
- Developed scalable REST APIs using Java and Spring Boot, improving backend performance.
- Managed global app state with Redux, increasing code maintainability.
- Reduced page load time by 60% via lazy loading, code-splitting, and database optimization.
- Designed responsive UIs with Material-UI and Bootstrap, speeding up frontend development.
- Automated testing using JUnit, Mockito, Cypress, and Jest, improving release quality.
- Deployed apps on AWS (S3, CloudFront, Lambda), achieving 99.9% uptime.
- Ensured WCAG 2.2 compliance, enhancing accessibility.
- Tech Stack: React.js, Redux, TypeScript, Spring Boot, Node.js, AWS, GraphQL, Cypress, Jest, JUnit, Jenkins, Mockito

Software Developer, Creative Soft Technologies - India

Mar 2020 - May 2022

- Developed SPAs with React.js and Redux Saga, improving performance and user experience.
- Built backend microservices using Spring Boot and Node.js, enhancing scalability.
- Implemented CI/CD pipelines with Jenkins, cutting deployment times by 30%.
- Integrated Kafka for real-time data streaming, increasing system responsiveness.
- Achieved 100% Lighthouse scores for accessibility and performance.
- Conducted load testing with JMeter, optimizing system throughput.
- Tech Stack: React.js, Redux Saga, JavaScript, Spring Boot, Node.js, MongoDB, Azure, Cypress, Kafka, JMeter, Jest, Next.js

Projects

Employee Attrition Prediction | Python, Pandas, NumPy, TensorFlow, Matplotlib, Seaborn, SQL

Jan 2019

- Designed a comprehensive data science pipeline to predict employee attrition and evaluate job performance using AI models. Integrated data preprocessing, feature engineering, and predictive modeling for actionable insights.

Moving Object Detection | Python, OpenCV, YOLO, Convolutional Neural Networks (CNNs)

Dec 2019

- Developed a system to detect and track moving objects in real-time video streams with 90% accuracy, enabling enhanced video analysis.

Attendance with Face Recognition | Python, OpenCV, Dlib, NumPy, Pandas, MySQL, PyTorch

Aug 2018

- Developed An automated system to track attendance efficiently by detecting and recognizing faces in real-time. Improved tracking efficiency by 50% and reduced manual intervention.
